READY TO FEEL THE DIFFERENCE?

FREE YOUR TOES
FREEDOM COLLECTION

Welcome

Dear partner,

In today's fast-paced world, true strength lies in collaboration. At Safety Jogger, we don't just keep up—we lead. This **catalogue** reflects what we can achieve together: bold innovation, reliable protection, and shared success.

As part of **Cortina**, a family-owned global leader distributing over 30 million pairs of footwear and apparel each year, Safety Jogger is uniquely positioned to push the boundaries of what's possible in personal protective equipment. Our mission is clear: **to provide complete head-to-toe protection for professionals across all industries** – from safety footwear and workwear to gloves, socks, eye protection, respirators, hearing protection, overshoes and helmets.

This year, we're especially proud to introduce our most revolutionary line yet: **FREEDOM**. Designed with the natural biomechanics of the human foot in mind, these safety shoes feature an **anatomically shaped last and toe cap** that allow your feet to move and your toes to spread – just as nature intended. It's a bold step forward in comfort and ergonomic performance.

Even though innovation is at the heart of everything we do, of course, it's only part of the story. At Safety Jogger, we believe strong partnerships are built on trust, consistency and shared success. That's why we offer an **always-in-stock guarantee**, dedicated **customer support**, and continuous investments in **design, comfort** and **quality**. We also equip our partners with powerful **digital tools** to streamline the buying experience and provide impactful **marketing support** and **sponsorships** to help grow visibility and sales.

And because we believe true progress must be sustainable, we continue to invest in more **responsible materials, processes** and **packaging**, with the goal of reducing our impact while increasing value for our partners and end users alike. **Sustainability** isn't a buzzword for us – it's a **long-term commitment**, just like the partnerships we build.

At Safety Jogger, we're more than a brand. We're a promise – **to protect, to innovate and to support**. As you explore the pages of this catalogue, we are convinced you'll see that promise reflected in every product we offer.

Sincerely,
Wim Vanderschueren & Tom Gybels
Founder & General Director

1950

Start of a small shoe factory in Belgium, named **Cortina**

1960

Import of footwear from **Italy**, Europe

1980

One of the first European companies to start **importing from the Far East and China**

cortina

1981

Launch of the **Cortina safety footwear collection**

1990

Registration of the **Safety Jogger brand name in Benelux**

2000

Launch of the **Safety Jogger brand in Europe**

2007

Selling of the first pair of Safety Jogger footwear in **Asia**

2011

Development and manufacturing of the **Safety Jogger work gloves collection**

2013

Acquisition of '**Oxypas**', the n°1 brand for medical and professional footwear

2015

Safety Jogger goes **USA**

2017

Acquisition of the leading German safety footwear brand '**Maxguard**'

2018

Launch of the **lightweight and tactical collection**

2020

Acquisition of '**Tiger Grip**', market leader in slip-resistant and safety **overshoes**

2022

Launch of **workwear and head protection**.

2024

Acquisition of '**Gevavi**', a leading importer and wholesaler

2025

Acquisition of **Edge Safety Equipment**, a leading European specialist in fall protection.

More than 70 years of experience

Safety Jogger's story began in **1950**, when a small and family-owned shoe company called **Cortina** was founded in Belgium. Over time, Cortina expanded and evolved into a global business with many brands in its portfolio.

Safety Jogger was launched in **2000** as one of Cortina's key brands. By leveraging Cortina's extensive experience, Safety Jogger quickly became a major player in the global market for certified personal protective equipment (PPE).

Today, Safety Jogger is trusted by many businesses worldwide, operating in **+143 markets** and selling more than **12 million PPE products** each year.

Protection from head to toe

At Safety Jogger, we are on a mission to offer a **one-stop solution from head to toe** for anyone, anywhere and anytime. Whether you need footwear, socks, overshoes, workwear, helmets, spectacles and goggles, respirators, earmuffs, ear plugs, or gloves, we have got you covered with **worldwide certified PPE products** for various industries and professions.

Our products are **engineered in Europe** by specialists who bring a wealth of expertise, after which they undergo rigorous testing in our **advanced lab** to ensure they meet the highest safety standards. We are committed to leading the industry through **innovation**, leveraging the latest technologies to deliver products that exceed global safety norms.

As a result, we set the industry standard with **modern and sustainable designs**, exceptional **comfort**, and the **best price-to-quality ratio available**. Supported by a **flawless supply chain**, a wide range of **digital tools**, and a **dedicated team** that goes above and beyond, Safety Jogger is committed to providing unparalleled service and protection for our customers.

Global presence in +143 countries

- ✓ Headquarters Belgium
- ✓ Head office Asia

- ✓ Office USA

Vision & mission

Vision

Delivering constant innovation in PPE by utilizing advanced technology and over 70 years of development experience.

Mission

Offering head-to-toe protection for every workplace, renowned for its modern design, competitive pricing and excellent quality.

Ambition

Building the best professional PPE company in the world, with unparalleled speed to market, innovation and value creation.

Our **promise** towards our **customers**

- ✓ **One-stop solution from head to toe**
- ✓ **Always in stock**
- ✓ **Immediate delivery**
- ✓ **Strong distribution channels**
- ✓ **Excellent customer support**
- ✓ **Online dealer platform**
- ✓ **Elaborate marketing support**
- ✓ **E-learning platform**
- ✓ **Worldwide availability**
- ✓ **Good quality at a competitive price**

OUR 4C SUSTAINABILITY STRATEGY

Here at Safety Jogger, our commitment to **sustainability** is woven into the very fabric of our brand. Our goal is to minimise our environmental impact and carbon footprint by incorporating sustainability into our design processes. We strive for carbon-neutral operations while prioritising the well-being of our employees, fostering responsible practices in our supply chain, and contributing to society positively.

As part of Cortina, we captured this ambition in our shared group **4C strategy**:

Care

Our pillar care focuses on the people around us, both our employees and our communities. In 2025, we will initiate the process to achieve the **Great Place To Work certificate**

for our employees, and support our communities by **funding charities**

aimed at promoting good mental health and wellbeing, fighting poverty and enhancing quality education.

Climate

Fighting climate change is essential for future liveability on our planet. Our contribution to this challenge focuses on **achieving net-zero emissions** for our **scope 1 and 2** by **2030** and **incorporating the product carbon footprint into our design processes by 2025** to reduce our scope 3 emissions.

Social Compliance

Ensuring a sustainable supply chain which respects social and environmental standards is essential to us. We want all our **Tier 1 suppliers** as well as our nominated **Tier 2 suppliers** to be **third-party audited by 2030**.

Ecodesign

We will incorporate the ecodesign principles into our design processes by calculating the sustainability impact for all our designs. In **2030**, **100%** of our packaging will be made from **recycled or recyclable materials** and by **2035** we will **lower the carbon footprint of our product materials** with **30%** by maximising the use of recycled and renewable materials.

Safety Jogger is a proud member of **EcoVadis**, a **third-party certification system** evaluating companies based on their **environmental impact**,

labour practices, **ethics** and **sustainable procurement**.

Did you know that we support various social projects, such as PsychoseNet, YouthStart, Goods to Give and many more?

Did you know that we already have an **eco-friendly footwear collection** with shoes made from certified recycled materials across all price ranges? And that a significant part of our **workwear collection** is also made from recycled materials? Our removable **SJ Foam Footbed** is even made from 100% recycled materials!

**10-12
PET
bottles**

Each pair of our ECOMORRIS safety shoes is made using the equivalent of 10-12 recycled PET bottles. By choosing ECOMORRIS, you're not only protecting your feet but also contributing to minimising waste.

PLATINUM

Top 1%

ecovadis

Sustainability Rating

SEP 2025

ECOVADIS PLATINUM

We are proud to announce that Safety Jogger has earned the **EcoVadis Platinum Medal**, one of the world's highest sustainability honors! This elite recognition places us in the **top 1% of all EcoVadis-certified companies worldwide**. This achievement is not just a milestone - it's a direct demonstration of our unwavering commitment to building a sustainable future.

What is EcoVadis?

EcoVadis is the **world's leading sustainability rating platform**, assessing companies on their environmental impact, labour practices, ethics, and sustainable procurement. It's **trusted by over 100,000 businesses** globally to **monitor** and **improve sustainability through supply chains**.

Why does this matter?

Achieving EcoVadis Platinum is a **powerful statement** to our customers and partners that **Safety Jogger takes sustainability seriously**. It's a direct reflection of our **4C strategy**, proving our deep-rooted commitment to ethical, transparent, and sustainable business practices.

What does this mean for you?

- ✓ **91% of companies** consider CSR criteria in their purchasing decisions.
- ✓ **85% of consumers prefer brands with a sustainability credentials**.
- ✓ In 2022, **\$362 billion in sustainability-linked loans** and **\$863 billion in green, social, and sustainability-linked bonds** were issued, highlighting the growing financial relevance of sustainable business.
- ✓ Over the past decade, **major new supply chain sustainability regulations** have been introduced worldwide, underlining the increasing importance of responsible sourcing.

With EcoVadis Platinum, Safety Jogger sets a **new benchmark in sustainability**, reaffirming that every product you offer comes from a trusted, responsible, and forward-thinking partner. This achievement is a **moment of pride for our entire team** and a testament to the values that guide everything we do - together with our partners, we are **building a safer, more sustainable future**.

PPE FOR EVERYONE

At Safety Jogger, our mission is to provide personal protective equipment that truly serves everyone. Our gender-specific footwear delivers support, stability, and protection for long shifts. Paired with workwear built for different body types and genders, we ensure every professional stays safe, comfortable, and confident on the job.

Custom lasts for shoes

There are no identical two human feet on this planet, and this perfectly sums up the complex nature of our industry. Just as there are no two identical feet, there are no universally fitting shoes. Acknowledging the significant differences in the anatomy of men and women, Safety Jogger has developed a wide range of custom lasts tailored specifically to all genders. Even when the design of a shoe is identical, our focus on fitting and proportions ensures that each product adheres to the anatomical requirements of our male and female customers.

Workwear designed for women

Our commitment to delivering products that prioritize both safety and comfort extends to our workwear collections as well. Our range includes men's and women's fits as well as unisex designs. This allows us to offer the right solution for different needs and preferences, while still guaranteeing freedom of movement and comfort throughout the workday. Additionally, our feminine sizes also come in a selection of colours.

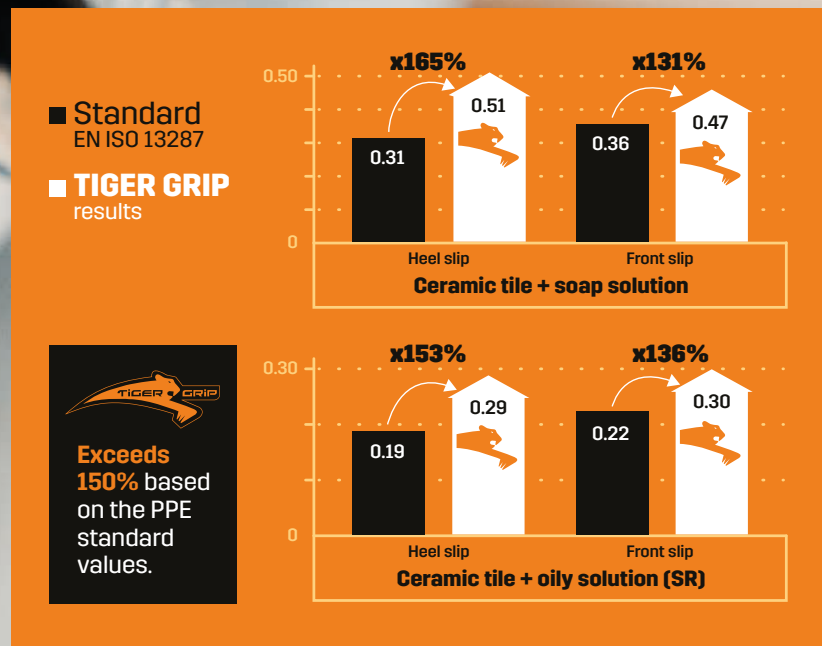

MATERIALS & TECHNOLOGY

Technology to perform

Tiger Grip is our **advanced slip-resistant technology**, designed specifically for outsoles. With Tiger Grip, you can

rely on **superior stability on any surface** — whether it's a greasy kitchen floor, a wet cleaning area, an industrial site with oil spills, or a construction zone with loose gravel.

TIGER GRIP TECHNOLOGY OFFERS YOU:

- Confidence on **any surface**
- **Stability**, control and safety
- Unbeatable **slip resistance** indoors
- Exceptional **grip & traction** outdoors

Tiger Grip's exceptional performance comes from its **unique rubber formula**, which delivers a durable and effective outsole suitable for all kinds of surfaces and terrains. The result? **Amazing slip resistance, grip and traction** that **outperforms the market standard with over 150%**, no matter where you are or what conditions you encounter.

OUTSOLE MATERIALS

The most common outsole materials are rubber, PU and TPU.

Rubber

Rubber is the **most versatile material**. It is suitable for a very wide range of environments and applications. Compared to PU and TPU, rubber is slightly heavier but offers a lot of advantages. It is exceptionally **slip resistant and heat resistant** (up to 300°C), extremely **durable, resistant to strong acids** and it has a **better cut resistance** than PU or TPU.

When rubber is combined with a layer of PU, EVA or Phylon, the outsole becomes lighter and softer. Safety Jogger always uses nitrile-based rubber (NBR) in its outsoles for enhanced performance.

PVC

PVC is mostly used in competitively priced footwear and mono-material products like rain boots. It is **resistant to most chemicals** and provides **good abrasion resistance**, but limited heat resistance.

Thermoplastic polyurethane (TPU)

TPU is a thermoplastic polymer. To form an outsole, TPU pellets are melted and blended. The hot mass is then injected into a mould at high pressure. TPU outsoles are **flexible, UV resistant** and **abrasion resistant**. They perform better in cold environments compared to standard PU.

The outsoles are easily recognizable because they are slightly translucent. Because of their higher density, they are usually more cut resistant and more durable.

Polyurethane (PU)

Polyurethane is a foamed polymer material. To form an outsole, liquid PU is poured or injected into an outsole mould. PU outsoles are **very comfortable, durable, lightweight** and offer **great shock absorption**, thanks to the high elasticity and soft texture of the material.

There are 2 types of PU outsoles:

- ✓ **A single-density PU outsole** is made of one material compound.
- ✓ **A double-density PU outsole** is made of two different material compounds.

During production, a first layer of PU is added to the mould. This first layer is the bottom layer that will eventually touch the ground when walking. Then the second layer, a softer and more flexible one, is added into the mould. This second layer will determine the cushioning and overall comfort of the outsole.

An outsole for every surface

	PU	TPU	Rubber
Slip resistance	✓	✓	✓
Durability	+	++	+++
Heat resistance up to	+/- 120°	+/- 150°	+/- 300°
Resistance to oils & fuels	✓	✓	✓
Resistance to strong acids	-	✓	✓

MIDSOLE MATERIAL

eTPU

eTPU midsoles deliver cutting-edge comfort and performance. Thanks to their **unique rebound effect**, around 60% of the impact energy from each step is returned to the wearer, creating a soft yet responsive feel that helps **delay fatigue**. Unlike traditional EVA or Phylon soles, eTPU retains its cushioning properties much longer, ensuring lasting comfort and durability without losing performance over time.

EVA & Phylon

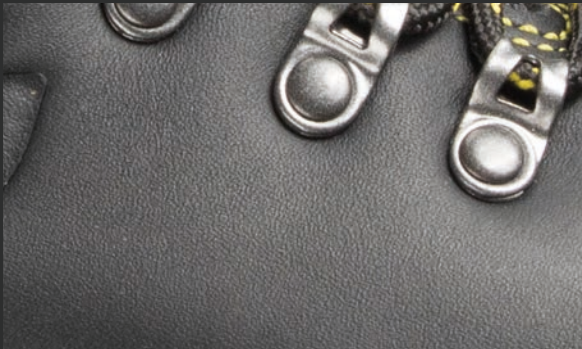

EVA and phylon, or double-baked EVA (Ethylene Vinyl Acetate), are often used as midsole in combination with rubber outsoles. Both materials ensure a comfortable step. They're **light**, have **good elasticity**, and especially phylon offers **superior shock absorption**.

Polyurethane (PU)

PU midsoles have a **lower density** for **better shock absorption** and **improved comfort**.

UPPER MATERIALS

The most common upper materials are leather, synthetics and textiles. Rubber and other materials can be used as well, especially to reinforce certain parts of the upper which are subjected to high abrasion.

Leather

Natural (full-grain) leather is the best choice for footwear. Animal hide, made durable through a complex tanning process, has been used for footwear for thousands of years. It is extremely durable, **tear resistant**, **abrasion resistant**, **temperature controlling**, **breathable** and **flexible**. This material primarily stems from the meat industry, where skins are mostly considered waste. Depending on the quality and price level, leather can show different surface structures such as full grain, corrected grain, PU-coated (action) leathers, nubuck and suedes. Other features such as waterproofness can be added during the tanning process.

Synthetics

Compared to leather, synthetic materials are **lighter**, **less expensive** and have a **homogeneous structure**. Certain functions such as waterproofness can be added more easily.

Microfibers

Microfibres are synthetics as well, but with a **higher quality level**. They are used as a (vegan) alternative to suede, nubuck or nappa leathers of animal origin. Microfibers show impressive **performance levels in terms of abrasion, tensile strength, breathability** and **weight**.

Textile/knitwear

Textile and knitwear uppers are extremely **lightweight** and **breathable** thanks to the open structure. By choosing specific yarns, extra features such as abrasion resistance, cut resistance, etc., can be added to the material.

A **puncture-resistant midsole** protects the shoes and feet against the penetration of nails through the sole. It's embedded between the footbed and outsole of puncture-resistant footwear.

Footwear certified to **EN ISO 20345** or **EN ISO 20347** and marked with **all S1P, S1PS, S3, S3S, S5, S5S, S7, S7S, O3, O3S, O5, O5S, O7 or O7S codes** has a puncture-resistant midsole.

Steel

P

- ✓ Made from coated steel or stainless steel
- ✓ Budget friendly and thin but not flexible
- ✓ Conducts cold, heat and electricity
- ✓ Not metal free

Puncture-resistant textile

PS / S

PL / L

- ✓ Made from aramid fibers
- ✓ Flexible but heavier
- ✓ Does not conduct heat or cold
- ✓ Metal free

Nonwoven

PS / S

PL / L

- ✓ Made from nonwoven fibers
- ✓ Lightweight and flexible but more expensive
- ✓ Does not conduct heat or cold
- ✓ Metal free

Puncture-resistant test nails

According to the EN ISO 20345:2022 standard, the puncture resistance of footwear must be tested using a slim (3mm) or a large (4,5mm) nail.

- ✓ Metallic midsoles are always tested with the large nail and marked with 'P'

- ✓ Non-metallic midsoles can be tested with either nail:
 - Test with slim nail: PS / S
 - Test with large nail: PL / L

Toe caps, protection from the inside out

TOE CAPS

A **protective toe cap** made according to the European and ASTM standard will protect feet from impact and compression injury, regardless of the material.

If safety shoes are certified to **EN ISO 20345**, they come with **certified protective toe caps** that withstand a force of **200 Joule**. Protective footwear certified to **EN ISO 20346** comes with certified protective toe caps that withstand a force of **100 Joule**. Occupational shoes that are certified to **EN ISO 20347** **do not offer** toe protection.

Steel

- ✓ Made from coated steel
- ✓ Budget friendly and thin but heavier
- ✓ Conducts cold, heat and electricity
- ✓ Not metal free, magnetic

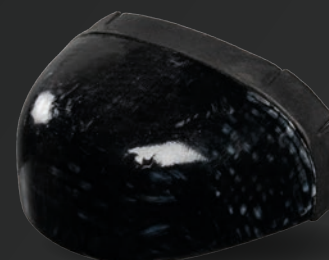

Aluminium

- ✓ Made from aluminium
- ✓ 30-50% lighter than steel
- ✓ Thicker and bulkier
- ✓ Conducts heat and cold
- ✓ Not metal free, non-magnetic

Composite

- ✓ Made from non-metal materials such as fiberglass and carbon fibre
- ✓ Thicker and bulkier
- ✓ 30% lighter than steel
- ✓ Does not conduct heat or cold
- ✓ Metal free, non-magnetic

Nanocarbon

- ✓ Made from carbon nanofiber
- ✓ Thin but more expensive
- ✓ 50% lighter than steel and 40% lighter than composite
- ✓ Does not conduct heat or cold
- ✓ Metal free, non-magnetic

Regular to extra wide toe caps

Safety Jogger offers footwear with toe caps in different widths

WORLDWIDE CERTIFICATES

No safety shoe without the right certifications

We are present worldwide and deliver certified products that meet global safety standards.

No matter what country you live in.

No matter which safety product you are interested in.

We provide the right certifications for your region!

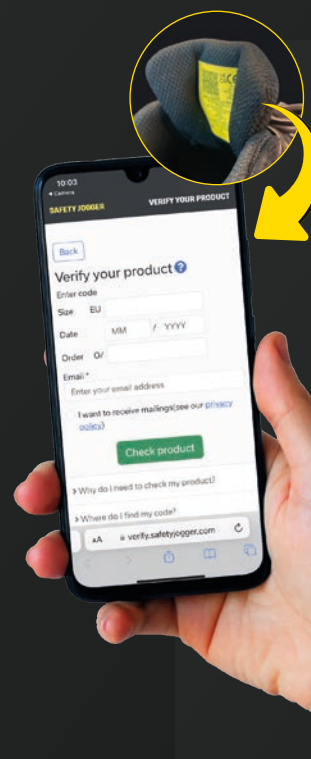

Safety Jogger's safety footwear is certified in accordance with the global standard for safety footwear.

Need a specific certificate for your area that we don't have yet? Let us know and we'll make it happen!

QUALITY IS KEY

By developing in our own facilities and inspecting all materials in our specialized test laboratory, we can monitor every aspect of our products. From design and construction to the final distribution. This way, all products are manufactured according to Safety Jogger's quality standards.

As a result, we are certified by the most known institutes in the industry and can guarantee our products meet the highest norms when it comes to protection.

Innovation in every step:

- ✓ Specialized **test lab**
- ✓ Advanced **R&D facilities** in Europe and Asia
- ✓ Experienced **footwear professionals**
- ✓ Use of the latest **footwear technology**
- ✓ **Certified** worldwide
- ✓ Modern **on-site sample room**
- ✓ State-of-the-art **machinery**
- ✓ Continuous **investments** in innovation and development

CERTIFIED ORTHOPEDIC SOLUTIONS

How does it work?

1 - The customer chooses a **Safety Jogger shoe suitable for individual orthopaedic solutions.**

2 - The customer sets up an **appointment with a podiatrist** of choice.

3 - The podiatrist **registers their practice on the Neskrider website** (www.neskrider.com).

4 - The podiatrist **measures the feet and forwards the data** to Neskrider.

5 - Neskrider uses the measurements to **create custom footbeds**. Alternatively, an **orthopaedic shoemaker** can make the **footbeds based on Neskrider's instructions**.

6 - The podiatrist receives the custom footbeds and **checks their fit** with the customer.

Shoes marked with the Neskrider logo are certified and suitable for an orthopaedic Neskrider footbed.

Are you in need of an orthopaedic footbed? As it is **not safe** and **not allowed to use standard orthopaedic footbeds in safety shoes**, Safety Jogger has partnered up with Neskrider. This Dutch company specializes in creating individual orthopaedic footbeds that meet the official regulations for safety footwear.

Germany - DGUV 112-191

The German regulation DGUV 112-191 came into place to meet the needs of workers who need orthopaedic adaptations.

Safety Jogger has several certified shoes in which orthopaedic adaptations can be made according to the DGUV regulation.

As the Neskrider and DGUV certificates have the same purpose, we chose to move forward with the globally available and recognized Neskrider service. If required, a DGUV certificate can be acquired upon request of the customer.

Worldwide service

Neskrider offers full service on a global level. No matter where you are located, having a Neskrider account will give you access to all solutions.

TECHNICAL FEATURES

Toe protection

Shoes with a safety toe cap prevent crushing of the toes in case of impact or compression.

Slip resistance

Safety shoes are all required to be slip resistant (tested on a ceramic floor with a soap solution). For added protection, some shoes undergo an extra slip-resistant test on a ceramic floor with glycerine (an oily solution). If they pass, they are marked "SR".

Antistatic

Antistatic shoes prevent a build-up of static energy inside the body, avoiding sparks that could cause ignition of gases, fire or explosions.

Heel energy absorption

Reduces the impact of jumping and running on the body by absorbing shocks and returning energy.

TECHNICAL FEATURES

Closed heel

Provides your feet with extra support and protection.

Waterproof

For shoes that are completely waterproof thanks to a membrane.

Water penetration and absorption

For shoes that keep your feet dry for a limited time.

Puncture resistance

These shoes have a puncture-resistant midsole that protects the feet against the penetration of sharp objects through the sole.

Cleated outsole

Protrusions on the sole of the shoe provide additional traction on a soft or slippery surface.

THE NEW STANDARD FOR SAFETY FOOTWEAR EXPLAINED - EN ISO 20345:2022

Standards for PPE products are regularly reviewed and adapted when necessary. This is also the case for EN ISO 20345. Until June 2022, the 2011 version of the standard was in place. From then on, the updated 2022 standard came into effect.

Certificates do not expire when a standard is updated. This means the certificates of all shoes certified to EN ISO 20345:2011 remain valid until their expiration date (which is 5 years from the date of issue).

CLASS 1 made from leather, textiles or synthetic materials

CLASS 2 made from rubber or polymeric materials

E	Heel energy absorption
UPDATE FO	Oil & fuel resistance

Electrostatic discharge
(EN 61340)

Electrical hazard
(ASTM F2413)

Did you know...

that the EN ISO 20345 standard has changed since 2022?

Slip resistance

EN ISO 20345:2011

Slip resistance had three different ratings: SRA, SRB and SRC.

- SRA outsoles were tested on a ceramic floor wetted with a soap solution.
- SRB outsoles were tested on a steel surface wetted with an oily solution (glycerin).
- SRC outsoles passed both the SRA + SRB test.

EN ISO 20345:2022

The slip-resistance test on a ceramic floor with a soap solution is from now on a **basic requirement** for all safety shoes, so no marking will be added. An extra slip-resistant test on a ceramic floor with glycerin (an oily solution) can be carried out as an **additional requirement** and will be marked **SR**.

Puncture resistance

EN ISO 20345:2011

P was marking puncture resistance.

EN ISO 20345:2022

The P marking is now used only for metallic midsoles. Shoes with non-metallic midsoles (fabric or nonwoven midsoles) are now marked PL or L / PS or S, depending on the type of nail.

- ✓ PL or L = puncture test passed with a nail of 4,5mm
- ✓ PS or S = puncture test passed with a nail of 3mm

Fuel & oil resistance

This is no longer a mandatory requirement. If the outsole is fuel & oil resistant, it is marked FO.

New categories

New S6 & S7 categories: to identify safety shoes that are completely waterproof thanks to a **membrane**.

- ✓ The S6 label corresponds to an S2 WR shoe.
- ✓ The S7 label corresponds to an S3 WR shoe.

WRU becomes WPA

Shoes with a **water-resistant** upper are now marked as WPA. WPA refers to the water penetration and absorption tests that are performed to determine the water resistance of the upper.

New additional features

- ✓ SC: abrasion resistance of the **scuff cap**.
- ✓ LG: adequate **grip** on a **ladder**.

AHX (EXTENDED ANTI HYDROLYSIS) POLYURETHANE

The outsoles of this footwear are made with AHX (extended Anti Hydrolysis) Polyurethane, a sustainable material that features **anti-hydrolysis technology**. Hydrolysis is the crumbling of the PU sole after a few years and is accelerated by warmth and humidity. AHX Polyurethane makes the sole stronger, increases the resistance against hydrolysis and is particularly useful in tropical climates, as it doesn't let heat affect its performance.

SJ FOAM FOOTBED

Comfort that works

Although 99% of people are born with healthy feet, two-thirds of them develop foot problems as they grow older. Safety Jogger addresses this issue with the SJ Foam Footbed. This **innovative** footbed, created by footwear and podiatry experts, enhances the fit and comfort in every Safety Jogger shoe.

The SJ Foam Footbed consists of two layers of open-cell (reticulated) recycled PU foam with different densities, along with a top layer made of **recycled polyester**. By combining these layers, the SJ Foam Footbed ensures a comfortable experience even during extended periods of standing or walking, while also **reducing fatigue**, smelly feet and skin irritations.

The key benefits of our SJ Foam Footbed:

- Made from 100% recycled materials
- Antibacterial
- Breathable
- Lightweight
- Conductive (perfect for ESD-featuring shoes)
- Shock absorption in the heel and forefoot
- Machine washable
- Removable and replaceable

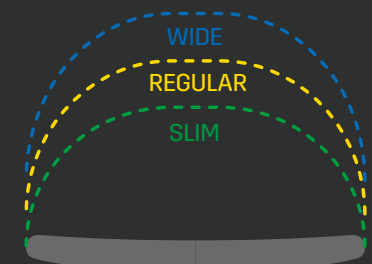

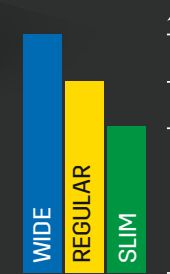

SJ3FIT

Adapt the width of your shoe to your individual needs

Feet come in different shapes and sizes, so we've developed the SJ3Fit system to complement our SJ Foam Footbed. Our SJ3Fit system allows you to adapt the width of the shoe to your individual needs by narrowing or widening the circumference of the shoe's ball region. With three different footbed options — Regular, Wide, and Slim—our SJ3FIT system ensures a **certified** safety shoe that fits perfectly, without compromising its safety.

Products certified for SJ3fit are marked with this icon:

EU

SJ3FITS

Slim fit

The Slim SJ3FIT Footbed is made for individuals with smaller feet. It is made with a thicker layer of PU foam and reduces excess space in the shoe, preventing unnecessary movement and ensuring a secure, comfortable fit.

Top layer:	High abrasion-resistant recycled polyester
Middle layer:	Recycled open-cell PU foam
Bottom layer:	Recycled open-cell PU foam
Size range:	35 – 48

EU

SJ3FITM

Regular fit

The Regular SJ3FIT Footbed is identical to our SJ Foam Footbed. It is the go-to choice for most foot shapes and sizes.

Top layer:	High abrasion-resistant recycled polyester
Middle layer:	Recycled open-cell PU foam
Bottom layer:	Recycled open-cell PU foam
Size range:	35 – 48

EU

SJ3FITW

Wide fit

The Wide SJ3FIT Footbed is made for individuals with broader feet. It is made with a thinner layer of PU foam and offers extra breathing room, ensuring a secure fit without any tightness or discomfort.

Top layer:	High abrasion-resistant recycled polyester
Middle layer:	Recycled open-cell PU foam
Bottom layer:	Recycled open-cell PU foam
Size range:	35 – 48

SAFETY JOGGER

INDUSTRIAL

LIGHT

APPLICATION

Light application footwear is engineered for dry environments. Wearers of this type of footwear typically work indoors, on relatively even floors. Examples of light application industries are logistics, assembly or even catering.

SAFETY JOGGER

INDUSTRIAL

MEDIUM

APPLICATION

Medium application footwear is engineered for both wet and dry environments with more robust requirements. People wearing this type of footwear usually have to carry out tougher jobs or kneeling activities. These shoes and boots can be used both indoors and outdoors and are therefore more all-round, but less fit for extreme circumstances. Examples of medium application industries are light construction, machine works, mechanical engineering or utility.

SAFETY JOGGER

INDUSTRIAL

HEAVY

APPLICATION

Heavy application footwear is engineered for dirty, muddy and rocky environments. People wearing this type of footwear mostly work outdoors and have to walk on uneven surfaces that demand high stability and protection of their feet. Examples of heavy application industries are road construction, building construction, oil and gas, or even mining.

WORKWEAR

WORKWEAR

Safety Jogger workwear equals both tough and good-looking garments, adaptable to the individual needs of each professional.

We continuously roll up our sleeves to provide workwear that works for everyone, whether you're on or off duty. Workwear that combines high-quality fabrics with extremely durable materials. Workwear that is comfortable and a pleasure to wear in all kinds of settings. Workwear that combines multiple functional features with a noticeable modern look.

Or in other words:

garments that will fit **each professional**, **each activity** and **each environment** like a glove.

HEIQ ODOUR CONTROL

The HeiQ Mint plant-based deodorizer controls malodor development on textiles, providing fabrics with a **long-lasting odor control capability** that keeps textiles smelling fresh all day long.

STANDARD
100

OEKO-TEX® STANDARD 100 is the standard for safety textiles, from yarn to finished product. Every item bearing the OEKO-TEX® STANDARD 100 label is **tested in the laboratory** against a list of over 1,000 potentially harmful substances and complies with strict limit values.

Did you know our workwear meets **several norms and standards?**

EN ISO 20471
High-visibility workwear

Makes the wearer visible from all directions at day, dusk and night. This protective clothing is required by law for anyone working on roads and construction sites. High-visibility workwear is categorized into three different classes that describe how well the product can make the user visible.

	Class 1	Class 2	Class 3
Fluorescent material	0,14 m ²	0,50 m ²	0,80 m ²
Reflective material	0,10 m ²	0,13 m ²	0,20 m ²

EN 343
Waterproof workwear

Protects against rain, snow, fog and ground moisture. The material and seams are tested for resistance to water penetration and vapor.

EN 14404
Workwear with knee protectors

Protects worker's knees when working in a kneeling position. The kneepads are tested for shock absorption, pressure distribution, resistance to sharp or pointed objects and various other requirements.

From 2-way to 4-way stretch

Comfort, flexibility and freedom of movement. the key features of all our work garments. That's why even in our **basic models**, we use

stretch materials for supreme comfort. Our **more advanced models**, in turn, have 4-way stretch in key areas. **4-way stretch** is stretchable in all directions and recovers both width and lengthwise, moving with your body and providing an unbeatable level of performance.

Wearing comfort that goes beyond a good fit

In addition to stretch fabrics, the design and material choices of our garments also contribute to the high level of comfort:

- ✓ Comfortable and soft materials
- ✓ Breathable zones in strategic places
- ✓ Lightweight fabrics that do not weigh you down
- ✓ Excellent wicking and drying performance in smart spots
- ✓ Strategically placed pockets and accessories that do not hinder

Softshell: a jacket essential

Need to maintain an ideal body temperature while being protected from the cold, wind and rain? Softshell holds the answer!

Softshell indicates a **category of technical fabrics that ensure maximum comfort in changing weather** and are particularly suitable for **physical outdoor activities**.

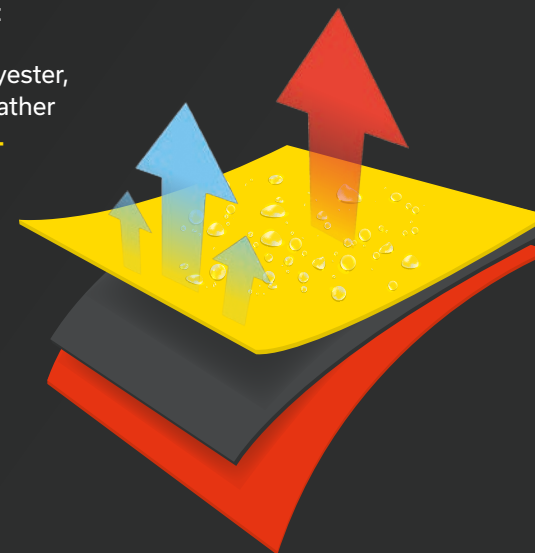

Why? Because generally, the more waterproof a garment is, the less breathable. Also more moisture will get trapped inside. Softshell is created specifically to **facilitate the release of moisture and regulate body temperature**.

To guarantee excellent performance, softshell jackets consist of **three layers of different materials**:

- ✓ **Outer layer** in **water-repellent** polyester, offering protection against bad weather
- ✓ **Middle layer** in a **breathable membrane**, allowing moisture to escape
- ✓ **Inner layer** made of **microfleece**, ensuring good thermal insulation

By connecting these three layers, we get a very light, elastic and soft material that provides numerous benefits:

- ✓ Flexible
- ✓ Breathable
- ✓ Insulating
- ✓ Water repellent
- ✓ Wind resistant

BAMBOO SOCK

Even the best shoes won't deliver on their promised comfort if you don't wear the right socks

Did you know that feet have the highest density of sweat glands? This helps our bodies to cool down, but can also lead to wet, uncomfortable feet and skin problems such as blisters and athlete's foot. The **Safety Jogger Bamboo Sock** offers a solution to these problems with the following benefits:

- ✓ Eco friendly
- ✓ Sweat absorbent
- ✓ Antibacterial
- ✓ Thermoregulating
- ✓ Soft and hypoallergenic
- ✓ A perfect fit

Elastane content

Offers light compression to reduce foot swelling, especially during long workdays.

Breathable design

Thin, open knit allows warm, humid air to escape, enhancing airflow and comfort.

Raised heel area

Reduces friction and pressure points at the heel.

Terry loops

Act as cushions to reduce pressure while standing or walking.

Terry cloth structure

Absorbs moisture effectively to keep your feet dry.

Damping cushion

Strategically placed at the instep to ease pressure from tight shoes

Dense terry cloth structure at the tip

Eases pressure and discomfort for those wearing safety shoes with toe caps.

HEAD PROTECTION

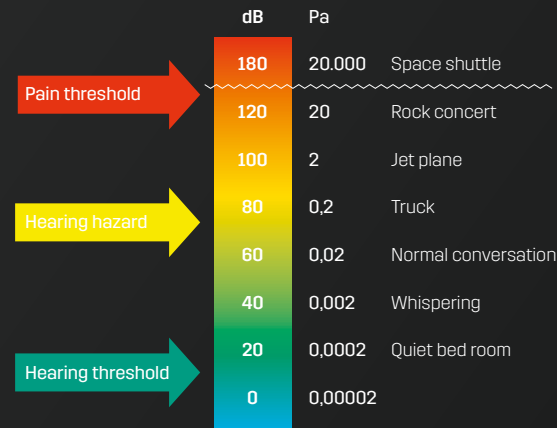

HEAD PROTECTION

Important numbers when choosing ear protection

What is considered excessive noise?

Sound is measured in decibels (dB). But what decibel levels are safe and which sounds can damage the ear?

- ✓ **<70 dB**: safe sounds that typically don't cause any hearing damage
- ✓ **>70 dB**: sounds that may damage your hearing after a certain amount of time
- ✓ **>120 dB**: sounds that cause immediate harm to your ears

Ear protection standards

Ear protection has an SNR rating. SNR stands for single number rating and gives you an estimate of the level of noise reduction that earmuffs or plugs can provide. This means that if you are at a rock concert with a noise level of 100 dB and you are, for example, wearing our Arusha ear plugs with an SNR of 37 dB, your new level of noise exposure is 63 dB.

HEAD PROTECTION

Important numbers when choosing eyewear

Optical filter & UV radiance

When choosing protective eyewear, you'll notice that the optical filter has a certain rating. For example: 2-1,2. But what does this mean?

The first number describes the type of filter:

- ✓ 2 & 3: UV filters
- ✓ 4: heat radiation filter
- ✓ 5: sun protection filter
- ✓ 6: infrared radiation filter

The second number describes the light transmission:

- ✓ 1.2: clear lens that transmits between 74,4% and 100% of visible light
- ✓ 2.2: dark lens that transmits between 29,1% and 17,8% of visible light
- ✓ The higher the number, the lower the transmission

An optical filter of 2-1.2 is a clear lens that offers UV protection. An optical filter of 5-2.5 is a dark lens that offers sun protection.

Impact resistance

Impact resistance is always tested with a steel ball of 6 mm diameter and a weight of 0,86 grams. When a lens has an **F marking**, the steel ball is fired at **45 m/s** or a speed of 162 km/h. When a lens has a **B marking**, the steel ball is fired at **120 m/s** or a speed of 432 km/h.

SAFETY JOGGER

INDUSTRIAL

GLOVES

Discover our **versatile range of safety gloves**, designed to meet the demands of various industries. Whether you're in logistics, automotive, construction, or tackling tougher jobs, we've got you covered with general-purpose gloves and cut-resistant options. Perfect for indoor and outdoor use, our gloves provide the protection and durability you need to get the job done safely.

GLOVES

GLOVES

STANDARD EN 388:2016

European standard for gloves protecting from mechanical risks

This mandatory standard applies to all protective gloves in terms of physical, chemical and mechanical hazards caused by abrasion, blade cuts, puncturing and tearing. The level of protection against mechanical hazards is expressed by an icon followed by four to six numbers (performance levels), each representing the performance against a specific hazard.

EN 388:2016

a b c d e f

	Rating
Abrasion	1-4
Cut (Coupe test)	1-5
Tear	1-4
Puncture	1-4
Cut (TDM-100 Test)	A-F
Impact protection	P

EN388:2016	0	1	2	3	4	5
a. Abrasion resistance (cycles)	<100	100	500	2000	8000	-
b. Cut resistance (factor)	<1.2	1.2	2.5	5.0	10.0	20.0
c. Tear resistance (newton)	<10	10	25	50	75	-
d. Puncture resistance (newton)	<20	20	60	100	150	-

EN ISO 13997 (TDM-100 test)	A	B	C	D	E	F
e. Straight blade cut resistance (newton)	2	5	10	15	22	30

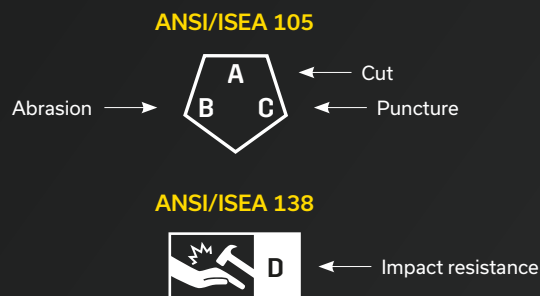

EN388:2016	Pass
f. Impact protection	P

- a. Abrasion resistance: based on the number of cycles required to abrade through the sample glove. (Martindale test)
- b. Blade cut resistance: based on the number of cycles required to cut through the sample at a constant speed with a circular blade.
- c. Tear resistance: based on the amount of force required to tear the sample.
- d. Puncture resistance: based on the amount of force required to pierce the sample with a standard-sized point.
- e. Cut resistance: based on the number of cycles required to cut through the sample at a constant speed with a sliding blade. (TDM-100 test)
- f. Impact resistance: Gloves with performance class "P" offer protection against an energy impact of 5 J.

American National Standard For Hand Protection Classification

Similar to EN 388, the voluntary ANSI/ISEA 105 standard is used to evaluate physical, chemical and mechanical risks for hand protection.

The level of protection against mechanical hazards is expressed by an icon including 3 numbers, each representing the performance against a specific hazard.

ANSI/ISEA 105	A1	A2	A3	A4	A5	A6	A7	A8	A9
A. Cut resistance (gram)	≥ 200	≥ 500	≥ 1000	≥ 1500	≥ 2200	≥ 3000	≥ 4000	≥ 5000	≥ 6000

ANSI/ISEA 105	0	1	2	3	4	5	6
B. Abrasion resistance (cycles)	< 100 (500 gram load)	≥ 100 (500 gram load)	≥ 500 (500 gram load)	≥ 1000 (500 gram load)	≥ 3000 (1000 gram load)	≥ 10000 (1000 gram load)	≥ 20000 (1000 gram load)

ANSI/ISEA 105	1	2	3	4	5
C. Puncture resistance (Newton)	10-19 N	20-59 N	60-99 N	100-149 N	150+ N

ANSI/ISEA 138	1	2	3
D. Impact resistance - mean (kN)	<9.0	<6.5	<4.0
D. Impact resistance - all impacts (kN)	<11.3	<8.1	<5.0

- A. Cut resistance: based on how many grams of force is required to cut through the sample. (TDM-100 test)
 B. Abrasion resistance: based on the number of cycles required to abrade through the sample glove. (Taber test)
 C. Puncture resistance: based on the amount of force required to pierce the sample with a standard-sized point.
 D. Impact resistance: based on the force the glove can withstand on the knuckles and fingers.

PROFESSIONAL

Safety Jogger Professional offers **occupational footwear** certified to the **EN ISO 20347 standard**. Our collection includes a wide range of stylish and comfortable work shoes and clogs, designed specifically for those working in medical, hospitality, cleaning, and catering industries.

LIGHT
APPLICATION

MEDIUM
APPLICATION

HEAVY
APPLICATION

The new standard for occupational footwear explained - EN ISO 20347:2022

Standards for PPE products are regularly reviewed and adapted when necessary. This is also the case for EN ISO 20347. Until April 2022, the 2012 version of the standard was in place. From then on, the updated 2022 standard came into effect.

Certificates do not expire when a standard is updated. This means the certificates of all shoes certified to EN ISO 20347:2012 remain valid until their expiration date (which is 5 years from the date of issue).

CLASS 1
made from leather, textiles
or synthetic materials

CLASS 2
made from rubber or polymeric
materials

		CLASS 1								CLASS 2			
		made from leather, textiles or synthetic materials								made from rubber or polymeric materials			
		OB	O1	O2	O3	O3L	O6	O7	O7S	OB	O4	O5	O5L
	Basic slip resistance (ceramic floor + soap solution)												
	Closed heel												
A	Antistatic												
E	Heel energy absorption												
UPDATE													
WPA	Water penetration and absorption												
WR	Waterproof												
UPDATE													
P	Metallic puncture resistant midsole (4.5mm nail)												
NEW													
PL L	Non-metallic puncture resistant midsole <i>PL = large nail 4.5mm</i> <i>PS = slim nail 3mm</i>												
PS S													
	Cleated outsole (cleat height ≥ 2,5mm)												

Additional features

AN	Ankle protection
M	Metatarsal protection
NEW SR	Slip resistance (ceramic floor + oily solution)
A	Antistatic
NEW LG	Ladder grip
NEW SC	Abrasion resistant scuff cap
CI	Cold insulation
HI	Heat insulation
HRO	Heat-resistant outsole (up to 300°C)
UPDATE P	Metallic puncture resistant midsole (4.5mm nail)
NEW PL	Non-metallic puncture resistant midsole (4.5mm nail)
NEW PS	Non-metallic puncture resistant midsole (3mm nail)
UPDATE WPA	Water penetration and absorption
WR	Waterproof
E	Heel energy absorption
UPDATE FO	Oil & fuel resistance

Electrostatic discharge
(EN 61340)

Electrical hazard
(ASTM F2413)

Did you know...

that the EN ISO 20347 standard has changed since 2022?

Slip resistance

EN ISO 20347:2012

Slip resistance had three different ratings: SRA, SRB and SRC.

- SRA outsoles were tested on a ceramic floor wetted with a soap solution.
- SRB outsoles were tested on a steel surface wetted with an oily solution (glycerin).
- SRC outsoles passed both the SRA + SRB test.

EN ISO 20347:2022

The slip-resistance test on a ceramic floor with a soap solution is from now on a **basic requirement** for all occupational shoes, so no marking will be added. An extra slip-resistant test on a ceramic floor with glycerin (an oily solution) can be carried out as an **additional requirement** and will be marked **SR**.

Puncture resistance

EN ISO 20347:2012

P was marking puncture resistance.

EN ISO 20347:2022

The P marking is now used only for metallic midsoles. Shoes with non-metallic midsoles (fabric or nonwoven midsoles) are now marked PL or L / PS or S, depending on the type of nail.

- ✓ PL or L = puncture test passed with a nail of 4,5mm
- ✓ PS or S = puncture test passed with a nail of 3mm

Fuel & oil resistance

This is no longer a mandatory requirement. If the outsole is fuel & oil resistant, it is marked FO.

New categories

New O6 & O7 categories: to identify occupational shoes that are completely waterproof thanks to a **membrane**.

- ✓ The O6 label corresponds to an O2 WR shoe.
- ✓ The O7 label corresponds to an O3 WR shoe.

WRU becomes WPA

Shoes with a **water-resistant** upper are now marked as WPA. WPA refers to the water penetration and absorption tests that are performed to determine the water resistance of the upper.

New additional features

- ✓ SC: abrasion resistance of the **scuff cap**.
- ✓ LG: adequate **grip** on a **ladder**.

LIGHT APPLICATION

MEDIUM APPLICATION

HEAVY APPLICATION

**SAFETY
JOGGER**
PROFESSIONAL

LIGHT

APPLICATION

Light application footwear is mainly used on even and dry floors with a limited risk of contact with liquids.

SAFETY JOGGER

ADVENTURE

ADVENTURE

Safety Jogger Adventure offers outdoor footwear designed to **explore every adventure**. Our hiking shoes combine unbeatable comfort, trendy designs and superior grip and traction, empowering you to conquer any terrain with confidence. Each pair comes with a reusable nylon bag, perfect for storing your dirty shoes and/or transporting them after use.

ADVENTURE TECHNOLOGY

360° comfort

360° comfort means that every part of the wearer's experience is designed for total ease. This includes no annoying seams or pressure points, a **great fit**, good **breathability**, flexibility for natural movement, **softness** on the skin, and effective **moisture control**. It ensures comfort from every angle and in every situation.

SJ Tex

SJ Tex is a high-quality, **waterproof** and **breathable** membrane designed for durability and robustness. It effectively keeps moisture out while allowing air to circulate, ensuring **comfort** and **long-lasting performance** in various conditions.

Tiger Grip technology

Technology to perform

Tiger Grip's exceptional performance comes from its **unique rubber formula**, which delivers a durable and effective outsole suitable for all kinds of surfaces and terrains.

TIGER GRIP TECHNOLOGY OFFERS YOU:

- Confidence on any surface
- Stability, control and safety
- Exceptional grip & traction

Performance Foam Technology (PFT)

Performance Foam Technology (PFT) improves the comfort of your footwear by offering excellent **cushioning**, **shock absorption**, and rebound properties. Made from **lightweight**, flexible and durable materials, PFT helps you stay agile, **reduces tiredness** and provides energetic support with each step.

SJ FOAM ALL SEASON

Conquer any terrain with confidence, knowing your feet are well-supported every step of the way.

Top layer	High abrasion-resistant recycled polyester
Middle layer	Recycled open-cell PU foam
Bottom layer	Recycled open-cell PU foam
Size range	36 - 48

Our **SJ Foam Adventure footbed**, designed by footwear and podiatry experts, features two layers of recycled PU foam with different densities and a recycled polyester top layer.

This innovative design offers exceptional comfort during long hikes, treks, or any outdoor activity, reducing fatigue, odours, and skin irritations.

The key benefits of our SJ Foam Adventure footbed:

- ✓ Made from 100% recycled materials
- ✓ Antibacterial
- ✓ Breathable
- ✓ Lightweight
- ✓ Shock absorption in the heel and forefoot
- ✓ Machine washable
- ✓ Removable and replaceable

SAFETY JOGGER

TACTICAL

TACTICAL

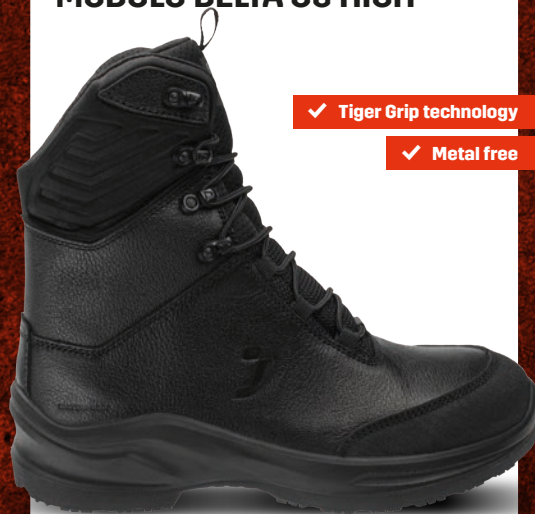

Safety Jogger Tactical offers **tactical footwear** certified to the **EN ISO 20345** or **EN ISO 20347 standard**. Our heavy-duty boots are made to perform under tough circumstances while ensuring comfort and agility, helping professionals to excel in any tactical operation.

Branding & visibility

Did you know that we established various **partnerships** to boost our brand's visibility all over the world?

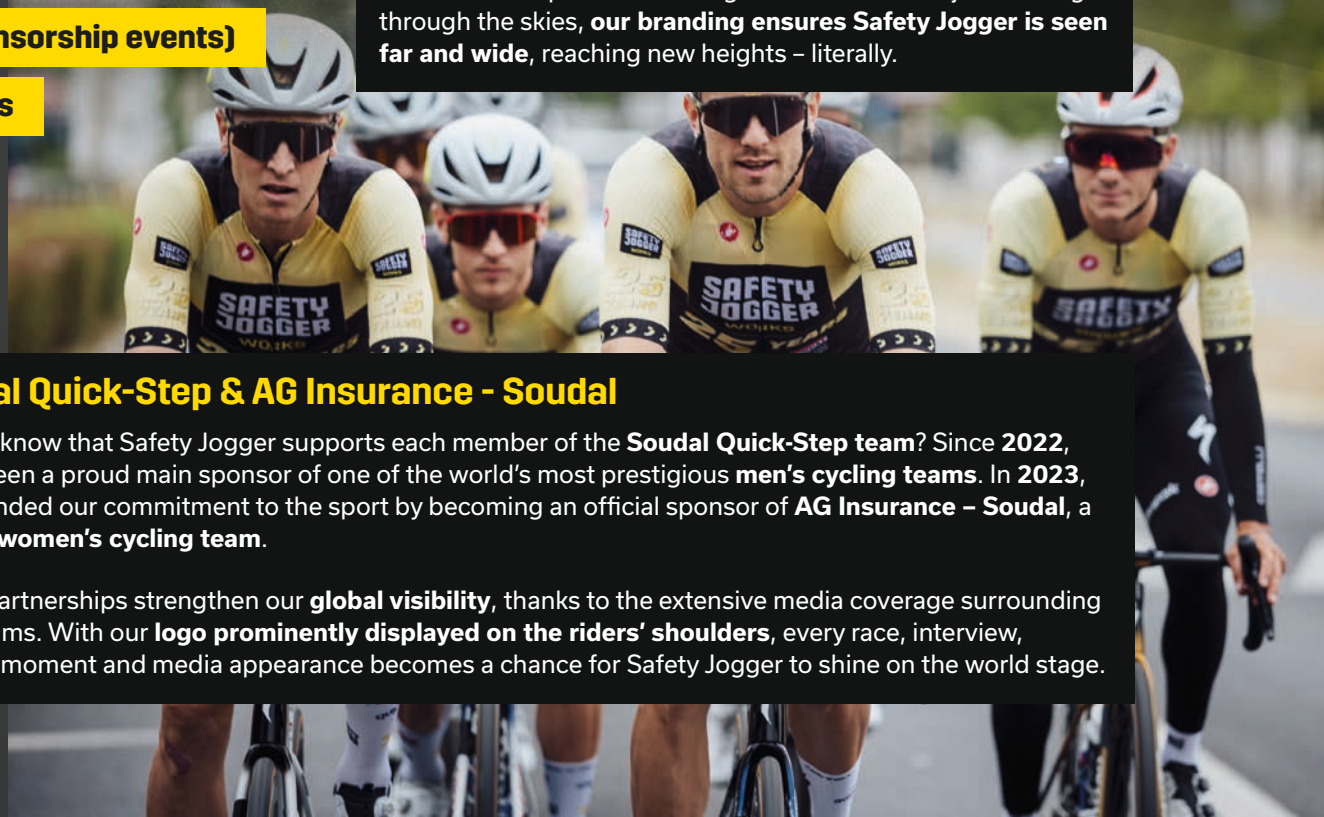

These partnerships will drive our joint business by:

- ✓ Increasing our media exposure
- ✓ Reaching a wider demographic and targeting new audiences
- ✓ Keeping our brand top of mind and building even more credibility
- ✓ Generating more brand visibility in-store (POS materials)
- ✓ Creating opportunities for dealer incentives (sponsorship events)
- ✓ Driving excitement, traffic and consequently sales
- ✓ ...

Safety Jogger airplane

Brand visibility doesn't stop at the ground level. For several years, Safety Jogger has also been visible in the air thanks to **three fully branded aerobatic aircrafts**. Whether impressing thousands of spectators during aviation events or just soaring through the skies, **our branding ensures Safety Jogger is seen far and wide**, reaching new heights – literally.

Soudal Quick-Step & AG Insurance - Soudal

Did you know that Safety Jogger supports each member of the **Soudal Quick-Step team**? Since **2022**, we've been a proud main sponsor of one of the world's most prestigious **men's cycling teams**. In **2023**, we extended our commitment to the sport by becoming an official sponsor of **AG Insurance – Soudal**, a top-tier **women's cycling team**.

These partnerships strengthen our **global visibility**, thanks to the extensive media coverage surrounding both teams. With our **logo prominently displayed on the riders' shoulders**, every race, interview, podium moment and media appearance becomes a chance for Safety Jogger to shine on the world stage.

Eurosport

Safety Jogger has also teamed up with **Eurosport** – Europe's leading sports broadcaster. Through a **powerful mix of television, digital and on-site exposure**, we're making sure our lightweight and breathable MODULO safety shoes – and the Safety Jogger brand – are seen across Europe.

Our **15-second MODULO commercial** is airing during **prime-time coverage of iconic sporting events** such as the Tour de France, Roland Garros, the Giro d'Italia, La Vuelta, and many more – reaching **over 85 million viewers** in **50+ countries** and bringing Safety Jogger into the homes of Europe's most passionate sports fans.

But visibility doesn't stop at the screen. We're also **outfitting 7,000 Eurosport crew members** with branded Safety Jogger workwear as they report live from major international competitions – giving our gear a front-row presence at the heart of the action.

To strengthen our digital footprint, we've launched a **multi-local campaign across Eurosport's online platforms**. With **2 million guaranteed impressions** from **pre-roll and in-read video ads**, we're connecting with sports fans across cycling, football, tennis, rugby, motorsports, winter sports and more – right where they're most engaged.

Branding & visibility

UGent racing

At Safety Jogger, we believe in investing in the future – and that includes supporting the next generation of engineers. That's why we proudly sponsor **UGent Racing**, the **Formula Student team from Ghent University**. This talented group of students designs and builds **self-driving electric race cars** to compete in **international competitions**, pushing the boundaries of technology, innovation and teamwork.

As part of our partnership, we're outfitting the team with **full head-to-toe protection**, including **workwear**, **safety shoes**, and **hearing** and **eye protection**. By providing high-quality personal protective equipment, we help ensure they can work safely and efficiently as they bring their groundbreaking vehicle to life. Because when safety is a priority, performance can thrive.

Gentse Feesten

The **Gentse Feesten** is one of the world's **largest city festivals**, attracting over **1,7 million visitors** for **10 days of non-stop festivities**. During this iconic event, we make sure Safety Jogger stands out with strategic brand visibility: from eye-catching **banners** and branded **beer mats** to **video ads** on large stage-side screens. As a **workwear sponsor**, we also equip staff and stage crews with Safety Jogger gear – ensuring they're both visible and protected throughout the festivities.

Bee Safe

As part of our commitment to environmental responsibility, we proudly support the **Hoornaar Spotter Initiative**, an innovative project tackling the spread of the invasive **Asian hornet**. These hornets pose a major risk to biodiversity, agriculture and honeybee populations.

Through our **sponsorship of the Hoornaar Spotter App**, users can report hornet sightings using precise geographic data, helping authorities locate and remove nests before they spread. Our **logo is prominently featured** throughout the app, ensuring Safety Jogger remains synonymous with safety and sustainability.

Alcatraz

Since day one, Safety Jogger has been a proud **head sponsor** of the **Alcatraz Metal & Hard Rock Festival** in Kortrijk, Belgium. This internationally renowned event attracts over 40,000 visitors and 6,000 campers from 54 different countries. During **three days of metal madness**, we help keep the crew safe while ensuring **maximum visibility** for our brand.

ALCATRAZ

Rally racing

Safety and speed go hand in hand – just like Safety Jogger and the world of rallying! We're proud to **support the thrilling sport of rally**, where precision, performance and protection are key. As part of our commitment, we also proudly support **Jonas Dewilde, two-time Belgian Junior Champion**, as he continues to push the limits in rally competitions across the country.

Widzew Łódź Academy

Safety Jogger entered a strategic sponsorship with the Widzew Łódź Academy for the 2023/24 season. As part of this partnership, the Safety Jogger logo will proudly decorate the center of the youth team shirts, demonstrating our commitment to nurturing the future talents of the four-time Polish champion football club. Our brand will also be present on the LED bands during the matches of the first team, on the advertising bands in the training center, in TV spots and on the social media of the Club and the Academy.

Dealer **support**

Digital showroom

Can't make it to our showrooms? Walk through them virtually! Our digital showroom is an interactive and unique experience that introduces you to our complete range of products in a 100% online environment.

Safety Jogger Academy

The Safety Jogger Academy is our own e-learning platform with a series of training videos to educate anyone who sells Safety Jogger products. Brought to you in a fun, clear and engaging way. Level up your technical and product knowledge and sell more!

Shop in shop

Have you already seen our shop-in-shop concept? This designated Safety Jogger sales area offers the right balance between our brand experience, density and aesthetics. It reflects our categories, but at the same time, it also reflects the flexibility that is at the heart of any retail environment.

Dealer content

Through our dealer platform - order.safetyjogger.com - you'll have access to several useful tools to support your business, such as:

A personal advertising creator

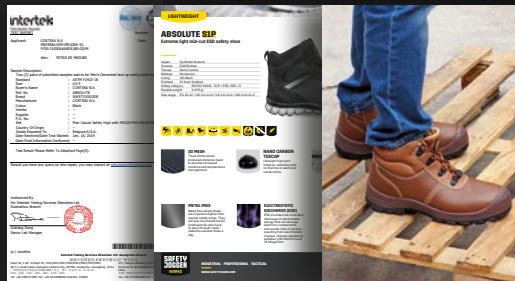

A free advertising tool to create your own advertisements and flyers in no time. Choose between an official promotion or make your own customized promotion.

Personal advertising

The screenshot shows the 'Personal advertising' interface. It features a header with 'SAFETY JOGGER' and 'CADOR S1P COLORS THAT WORK'. Below this is a list of steps to create an advertisement: 'Choose a template', 'Select your products', 'Add your price', 'Add your company logo', and 'Add your company information'. There are also options for 'Official promotion' and 'Customized promotion'. The interface includes a preview of a shoe and a list of product categories.

A marketing section

With product & lifestyle images, videos, marketing tools, technical knowledge and all the content you need to maximize your sales

In-store branding

Did you know that we offer our dealers several free POS materials? We have merchandise available with a Safety Jogger or a Quick-Step Alpha Vinyl branding to make a visible impact in your store!

Merchandising

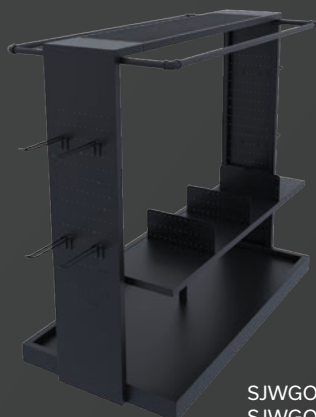

Did you know that we also support our dealers with an array of complimentary POS materials and merchandising items? Below, you can catch a glimpse of what's available, but we have much more in store for you. Don't hesitate to get in touch with your sales representative for a comprehensive overview of our offer!

*The women's size table is only applicable to products specifically designed for women.

A. CHEST

Measure horizontally across the widest part of the chest. Make sure the measuring tape is held straight across the back and do not pull the tape too tight.

B. WAIST

Men: measure horizontally at belly button height.
Women: measure horizontally across the narrowest part of the waist.

C. HIP

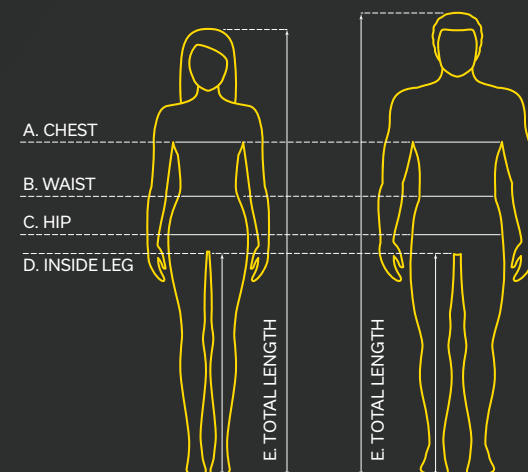

Measure horizontally across the widest part of the hips.

D. INSIDE LEG

Measure from the crotch to just below the ankle bone. Make sure the measuring tape is stretched.

E. TOTAL LENGTH

Measure the distance from the ground to the top of the head. Stand upright and do not wear shoes.
